CHANGE AHEAD

COMPREHENSIVE SAFETY ANALYSIS (CSA) 2010 IS COMING SOON!

Will you be ready?

CSA 2010 changes the way FMCSA assesses and addresses commercial motor vehicle safety! Under CSA 2010, FMCSA evaluates carrier safety using all on-road performance data from roadside inspections and crash reports. All safety-based violations count, not only out-of-service or moving violations; inspections without safety violations count too! CSA 2010 addresses safety issues by contacting more carriers earlier so carriers can correct safety problems before crashes occur. Prepare today by staying informed!
